OK. I'll put together any info I have and send it to you shortly.
Thanks,

Suddha Graves

Subject: Dimock - Residential Well HW-47

Hi Suddha -

I am sending this now - so that I don't forget to ask you later.

Based on the preliminary results - we have elevated arsenic (90s ug/L) in the samples collected from HW-47.

From the well survey info collected by EPA we know the following:

- well approx 450' deep, well approx 40 yrs old, original pump
- have a softener and chlorinator (installed in the 70s)
- there are also 2 other wells on the property (one deep which is used for irrigation and one shallow hand dug well)

I would appreciate it if you could check the field logs for any additional information noted by the sample team. It would be helpful if I could get this info by noon.

Thanks - Kelley
